

CodeVedX

Coding Knowledge, Delivered X-factor.

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING (AI/ML)

ABOUT US

CODEVEDX is a vibrant and diverse community that brings together individuals with similar objectives and ultimate goals. Our main focus is on creating opportunities that span various areas, including leadership development, learning, student engagement, and fostering shared interests.

We believe in the power of leadership and its ability to drive positive change. That's why we provide platforms and resources for our community members to develop their leadership skills. Through mentorship programs, workshops, and collaborative projects, we empower individuals to take on leadership roles and make a difference in their respective fields.

INSTRUCTIONS

- Update your **LinkedIn profiles**
- For the **Artificial Intelligence & Machine Learning (AI/ML)**, you will need to complete at your convenience for successful completion of the internship.
- Maintain a separate GitHub repository(name **CODEVEDX** for all the tasks and share the link of the GitHub repo in the task **submission form(it will be given later through email)**).
- You can refer to online resources such as Google Search and read tutorials. Watch videos (For Help).

SUBMISSION

1. **A TASK SUBMISSION FORM** will be shared later through email . Till then please continue your task.
2. A video need to be created to showcase your work, demo of your effort
3. The video can be hosted on LinkedIn for proof of your work and build credibility among your peers . You can tag **CODEVEDX** in such posts.
4. Please add #codevedx in each of your task video postings on LinkedIn, Additionally, you can also add hashtags such as #internship #AI/ML ment. for more reach and visibility.

ARTIFICIAL INTELLIGENCE & MACHINE LEARNING (AI/ML)-TASK PLAN

GET SOCIAL WITH US!

ww.codevedx.com

contact@codevedx.in

CodeVedX

◆ PROJECT 1 – Training + Internal AI Tool

Focus

Python basics, code quality, ML foundation, company workflow

Daily / Weekly Work

- **Python setup & coding standards**
- **Data types, loops, conditions**
- **NumPy & Pandas basics**
- **Daily problem-solving tasks**
- **Git basics (commit / push / pull)**

Project 1: Utility Usage Prediction Tool (ML – Console)

Features

- **Menu-driven console system**
- **Add / update usage data**
- **CSV file handling**
- **Simple ML model for prediction**
- **Exception handling**

◆ PROJECT 2 – Training + Data Analysis Tool

Focus

Data preprocessing, analysis, ML workflow

Daily / Weekly Work

- Data cleaning & preprocessing
- Handling missing values
- Exploratory Data Analysis (EDA)
- Feature selection
- Git branching practice

Project 2: Student Performance Prediction System (ML)

Features

- Input: attendance, marks, study hours
- Predict final performance
- Data visualization (charts)
- Model accuracy evaluation

◆ PROJECT 3 – Training + NLP Based Tool

Focus

Natural Language Processing basics, text handling

Daily / Weekly Work

- Text preprocessing (tokenization, stopwords)
- TF-IDF & vectorization
- Text classification concepts
- Debugging ML pipelines

Project 3: AI Based Fake News Detection Tool

Features

- News text input
- Fake / Real classification
- Confidence score output
- Trained ML model storage

◆ PROJECT 4 – Training + Conversational AI Tool

Focus

NLP, intent detection, backend integration

Daily / Weekly Work

- NLP fundamentals
- Intent & entity recognition
- Dataset preparation
- Flask basics
- GitHub collaboration

Project 4: AI Chatbot for Internal Helpdesk

Features

- Question–answer chatbot
- Intent-based replies
- FAQ dataset training
- Admin update capability

◆ PROJECT 5 – Training + Recommendation Engine

Focus

Advanced ML logic, real-world AI use cases

Daily / Weekly Work

- **Similarity algorithms**
- **Recommendation logic**
- **Model optimization**
- **Clean project structure**
- **Documentation writing**

Project 5: Smart Recommendation System (AI/ML)

Features

- **User preference input**
- **Personalized recommendations**
- **Content-based filtering**
- **ML similarity scoring**

Internship Instructions & Guidelines

- **All projects must be uploaded on GitHub with proper commits**
- **Each project must have a README.md**
- **Project documentation (PDF + PPT) must be uploaded to Google Drive**
- **A project demo video (1–3 min) must be uploaded on LinkedIn**
- **Submit the GitHub link + LinkedIn video link via the official Google Form**
- **Weekly progress updates are mandatory**
- **Plagiarism or copied code is strictly prohibited**
- **Final project demo is compulsory**

ASK US FOR HELP!

- THE PURPOSE OF THIS INTERNSHIP IS TO LEARN AND GROW
- We have no desire to dictate to you. It is entirely up to you whether you seek guidance or not.
- The given tasks may seem very easy or very difficult. We expect you to approach the tasks with professional diligence and give them the attention they deserve."

Thankyou!
